Nova’s whole blood meters and test strips provide accurate results by utilising Multi-Well™ biosensor technology, which measures and corrects for interferences such as haematoctrit, paracetamol, ascorbic acid, and uric acid that can cause erroneous results on other handheld whole blood meters. Other features include:

- Easy, handheld operation
- Samples as small as 0.6 microlitres
- Results as fast as 6 seconds
- No calibration coding
- Single connectivity solution
- Choice of hospital connectivity or Xpress meter

Specifications subject to change without notice.
